

LEARNING EXPERIENCE OVERVIEW

JA Take Stock in Your Future[®]

► Financial Literacy

JA Take Stock in Your Future introduces teens and young adults to the stock market. This learning experience includes two components: a classroom curriculum, and for many participants, the *JA Stock Market Challenge[®]* competition event.

The classroom curriculum comprises five sessions that introduce participants to basic concepts about how the stock market works and the impact of current events on the stock market. The learning experience also includes multiple self-guided extension activities that engage participants in deeper learning about the stock market and investing. Through *JA Take Stock in Your Future*, participants discover the benefits and challenges of investing in the stock market as part of a broader, long-term investment strategy and the risks and rewards of trading.

This learning experience is part of the JA Financial Literacy Pathway with a secondary focus on Work and Career Readiness competencies and is designed for Grades 9–12 and post-high school. The learning experience is primarily educator-led content, with multiple options for volunteer engagement.

LEARNING EXPERIENCE HIGHLIGHTS

- Materials available in digital and print formats, with educator- and volunteer-led implementation options
- Curriculum delivery in person (face-to-face in the classroom) or virtually (online in a remote classroom)
- Five sessions, plus optional extension sessions
- Optional online or site-based *JA Stock Market Challenge* competition

JA Take Stock in Your Future

CURRICULUM OUTLINE

Session	Overview Participants:	Objectives Participants will be able to:	Activities
SESSION FIVE Planning for the Future	<ul style="list-style-type: none">• Reflect on their experience participating in the in-class competition and/or the <i>JA Stock Market Challenge</i> event and connect the simulations to the real world.• Conclude the learning experience by developing their own financial goals.	<ul style="list-style-type: none">• Compare and contrast real versus simulated stock markets.• Identify various asset classes and assess the risks of each.• Develop a personal financial plan.• Reflect on what they learned throughout the learning experience.	<p>Warm-Up: Simulation Experiences (10 minutes)</p> <p>Participants reflect on their experience from competing in the simulation.</p> <p>Explore: Risk Management (10 minutes)</p> <p>Participants learn about asset classes and the connection between risk and time when selecting types of investments.</p> <p>Discuss: Planning for the Future (20 minutes)</p> <p>Participants create a personal financial plan that includes investing.</p> <p>Wrap-Up: Program Reflection (5 minutes)</p> <p>Participants reflect on what they learned during the learning experience.</p>

EXTENSION ACTIVITIES

The following **optional** extension activities are available for deeper exploration of the topics and ideas in each session. Educators and volunteers may pick and choose from the extensions to address additional objectives or to extend the 45-minute sessions. Extension activities are designed for participants to complete independently. Educators and volunteers may choose to lead the introduction and wrap-up with participants in person (face-to-face in the classroom) or virtually (online in a remote classroom), or they can assign participants to complete the work as an entirely self-guided activity.

The extensions may be implemented at any time, but suggestions for the corresponding sessions have been provided.

JA Take Stock in Your Future

SELF-GUIDED EXTENSION ACTIVITIES OUTLINE

Extension	Overview	Objectives Participants will be able to:
Private vs. Public Companies (Suggested for Session One)	In this 15-minute extension activity, participants learn the basics of company ownership models using a pizza business scenario. They explore the advantages and disadvantages for a company of remaining private or becoming publicly owned.	<ul style="list-style-type: none"> • Demonstrate an understanding of the differences between private and public companies as they relate to company ownership. • Explain why a company would remain private or go public.
